OBJECTIVE

Program Python Or PHP As A Contractor

EXPERIENCE

2007-Present **A Byron Deans Consulting**

- Built ReallyFreeResumeBuilder.com, a website that has built thousands upon thousands of resumes for people mainly in the USA
- Built and debugged PHP web applications as a contractor

2019-Present **Byron Deans London Publishing Limited**

Northwood, Greater London

Director

- Created working prototype that helps teachers quiz students
 - Wrote the prototype in Python/Flask and JavaScript, and host it on Linux server I manage, using Apache to serve up code, and Postfix and Dovecot to handle corporate emails
-

PROJECTS AND SKILLS

- PHP — Created ReallyFreeResumeBuilder.com and went on to work as a contractor building websites for small businesses
 - SQL — Have used some form of SQL for every web app I've created. Started my career with MySQL, and during the Harvard certificate (see below) learned PostgreSQL, which I used for CurriculumGrade.com
 - Python — Completed Microsoft's intermediate certificate (see below), and then went on to a Harvard certificate in Python and JavaScript (see below)
 - JavaScript — Did a contract for a local company in Fairfield, after reading most of a book (I was brought in by a friend, and the company was HFI). Later, used JS as a contractor regularly, and recently for the Harvard certificate (see below) and CurriculumGrade.com
 - Linux — Co-founded a Linux club in my early 20s and to this day have CurriculumGrade.com running on a Linux server I am administrator of, with Apache serving the web app, and a Postfix and Dovecot email server for CurriculumGrade.com email addresses
 - Python/Flask — Learned Flask during the Harvard certificate (see below) and then went on to create CurriculumGrade.com, which has a lot more complexity than even the final project of the Harvard certificate, which is the most complex, and requires the student to defend the complexity as meeting certain guidelines (not that web programming is particularly complex, in my opinion; my dad's career was spent meeting Russians, among other things, as a physics professor, and sometimes I'd meet his colleagues: what they did was complex)
 - Python/Django — All experience with Django is from the Harvard certificate (see below)
-

EDUCATION

- Private School (Maharishi School of the Age of Enlightenment) in Fairfield, Iowa, USA, where I scored 1470/1600 on the SAT (1999), and was a National Merit Commended Scholar (1998)
- Harvard University CS50's Web Programming with Python and JavaScript <https://cs50.harvard.edu/certificates/51bb31c9-2af7-4bc2-af26-a51d49402198> (hosted on Harvard's website) or <https://t.co/pfjelH7aZQ?amp=1> (hosted on Edx)
- Intermediate Python Certificate <https://courses.edx.org/certificates/6a8ba6d102904bf188821fe3ab9ed33f> (hosted on Edx)
